

INTRODUCING SHEAR COMFORT

Benefits of Wool:

- Regulates temperature
- Wicks moisture
- Reduces shear & friction
- Redistributes pressure

Shear Comfort by Healthcare Innovations Australia is a range of advanced medical grade lamb's wool products for skin care, comfort and protection.

Made from XD1900, an innovative and advanced woven wool with an extra high density of 1900gsm and a 30mm pile. Can be washed at hot temperatures up to 80°C to effectively kill bacteria without causing shrinkage, unlike other wool products.

The **Shear Comfort Cushion-It** is a sheepskin overlay that can be placed over existing pressure-care cushions to improve the feel and effectiveness of the cushion or attached securely to a chair seat or back for enhanced comfort. Features adjustable Velcro straps.

The **Shear Comfort Mattress Overlay** is a sheepskin overlay designed to alleviate pain and discomfort caused by high pressure between the skin and the mattress. It provides microclimate control, improved sleep quality and pressure care to relieve the skin and joints for a more comfortable sleep. Available in single or queen bed size. Targeted skin protectors are also available - view the full range on www.c1south.co.nz.

TOPO MAT

Topo Mat by Ergodrive is the only anti-fatigue mat designed with standing desk users in mind. Unlock the true benefits of standing desks with Topo.

While there are many benefits of standing over sitting, it is only healthier if it is done right and that requires increased movement. Topo has been meticulously designed with 'terrain' features to encourage healthy movement by subconsciously moving your feet to explore, articulate, and stretch as you stand.

The peaks and valleys activate blood flow and engage more muscles than simple standing mats are able to. Made from a durable and comfortable polyurethane foam.

SMART GADGETS - NEW

Nimble: The world's first one-finger cutter for opening packaging

Ungrip: Never drop your mobile phone again

Sixth Digit: Press physical buttons and touchscreens with ease

Zip Grips: Opening and closing zips has never been easier

PHYSIPRO CUSHIONS - IN STOCK

Zero-pressure cushion shape, scientifically designed using pressure sensors. The Zero-Pressure is shaped to reduce pressure on bony prominences (ischium and coccyx) and to distribute weight over the entire cushion surface. The ischial ridge provides effective support to prevent the pelvis from sliding forward (backward tilt), and provides lateral support for better postural balance. 2½" thick. Made from injection moulded foam and soft memory foam. 14x14 to 20x20.

Lightweight, soft, and slightly contoured. The Brio is an economical cushion intended for individuals who require moderate positioning and pressure relief. The cushion is designed for stability, to help reduce sliding and shearing. 2½" thick, lateral wedge ¾" each side. Made from urethane foam sheeting and memory foam. Lightweight, less than 1kg. 10x10 to 20x20.

TO BE DISCONTINUED

We will be discontinuing our **Nxt Seating Series** by Dynamic Healthcare Solutions at some point in 2017. Our remaining stock will be available for trial/purchase at very competitive prices. While stocks last - please contact us for availability. The discontinued products include:

- Cushions: KulFit, BioFit
- Fixed Height Back Supports: Optima Plus Contour, Active Contour, Support Contour, Plus Contour
- Height Adjustable Back Supports: Kids Contour, HA Active Contour, HA Support Contour, HA Plus Contour
- MAPS/Armadillo Back

Please note we will continue to sell our popular range of Matrix cushion and back supports by Motion Concepts in paediatric, standard and bariatric sizing.
