

ACCESSORIES

The Embrace Mouldable Base Insert

Constructed out of high strength, lightweight aluminium and can be 'moulded' to enable cushion customisation for additional contour and support. The unique insert was designed to be used with the Embrace Anti-Thrust and Zero Elevation cushions.

The Embrace Mouldable Base Insert can be moulded by hand or with the provided tool for additional contour and support, whilst retaining its shape, even under the most active users.

This system allows for on-site customisation. The dynamic nature of input provides positioning support while allowing for movement. The insert can be remoulded to meet changes in a person's physical and functional needs.

Paediatric 10x10 to 14x14, Standard 14x18 to 20x20 and Bariatric 22x16 to 22x20

Cushion Rigidiser

Made from a strong, durable yet lightweight ABS plastic and are designed to be placed at the base of a wheelchair cushion (inside the cover). A Rigidiser will help decrease any hammocking effect of slung upholstery and provide a firm, stable support base. Features a slim 6mm profile and are available in any size.

The Pelvic Obliquity Kit (POK)

A foam insert that can easily be installed between the layers of a Matrix Vi, Heavy Duty or Kidabra cushion, or underneath the base of any cushion for a custom fit. The POK accommodates ½" or 1" obliquities and features a cutting guide for the appropriate cushion width (up to 22") and adhesive strips for easy application.

Padded Hip Belts - 2 and 4 Point Padded Lap Belts

Positioning straps provide postural alignment and distribute pressure for all day comfort. Features a centre-pull, push button and four or two points of attachment.

Cinch and flat mounts available and in both large and small sizing.

ACCESSORIES

Complete Headrest / Headrest Hardware / Headrest Pads

A full range of headrests and/or hardware as required is available from C1 South. The Complete Headrest by Motion Concepts is a type of multi-axis mounting hardware kit designed to provide head and neck support with the Matrx back supports. Includes hardware and pad - please note that a headrest adaptor is required for the Elite Back.

Stimulite Lumbar Support

Made from Stimulite honeycomb with a stretch breathable cover. It provides firm support, conforming comfortably to the natural curve of the body whilst being seated to improve posture and relieve pressure. The unique perforated honeycomb circulates air and evaporates moisture keeping the body cool and dry. Features a removable, adjustable strap. Measures 15x11.

Stimulite Tension Adjustable Back Upholstery

Designed for fixed frame/rigid wheelchairs and features the specially designed Stimulite honeycomb to circulate air and evaporate moisture while equalising pressure for exceptional comfort and stability.

Available in four sizes: 14x12, 16x12, 18x12, 20x12

Visco Foam Upgrade

Designed for those who need more comfort or need to immerse more into the back foam. We can add different grades of Sunmate / Visco foam to suit your clients needs.
