

INTRODUCING PHYSIPRO - MID 2016

***Zero-pressure cushion shape, scientifically designed using pressure sensors***

The **Zero Pressure Cushion** is shaped to reduce pressure on bony prominences (ischium and coccyx) and to distribute weight over the entire cushion surface. The ischial ridge provides effective support to prevent the pelvis from sliding forward (backward tilt), and provides lateral support for better postural balance. 2½" thick. Made from injection moulded foam and soft memory foam. 14x14 to 20x20.

***Lightweight, soft, and slightly contoured***

The **Brio Cushion** is an economical cushion intended for individuals who require moderate positioning and pressure relief. The cushion is designed for stability, to help reduce sliding and shearing. 2½" thick, lateral wedge ¾" each side. Made from urethane foam sheeting and memory foam. Lightweight, less than 1kg. 10x10 to 20x20.

Abduction Pommel & Mechanism: Designed for cases of severe adduction. The swivel mechanism is activated by a latch under the seat. Simply press the central lever to release. The pommel is made of high-density foam and topped with dispersion foam.

Matrix Libra Cushion by Motion Concepts: The Libra is specially contoured to provide balance and stability to the pelvis, optimising body function. The *Libra Fit Kit* includes wedges, fluid supplements and abductor accessories to enhance immersion, correct or accommodate orthopaedic issues, offering positioning and adjustability for unique user needs. Ideal for users at high risk of skin break down. Available in 14x12 to 20x20.

Matrix PS Cushion by Motion Concepts: The Posture Seat (PS) Cushion is now available in smaller paediatric sizes, starting from 10" wide. Designed to provide superior positioning, stability and comfort. Features an anatomically contoured shape with a unique waffled ischial relief recess. Available in 10x10 to 28x22.

Matrx Mini Back by Motion Concepts: The Mini Back has a contour depth of 3" and is contoured to fit children of all shapes and sizes - combining exceptional support in an appealing low profile package. Features Mini Set hardware, a miniature version of the standard Easy Set hardware. Available in 10" to 14" to fit 10" to 15" wheelchairs, with height options of 7" or 10".

Nxt MAPS 'Armadillo' Back by Dynamic Health Care Solutions: The Multi-Adjustable Postural Support is a modular back support designed for users with kyphosis or other spinal deformities. The shell is comprised of three members which can be independently adjusted for a unique fit. Mounting hardware allows for multiple adjustments of height, depth and angle. Available in 16" to 20" to fit 16" to 22" wheelchairs, with height options of 16" or 18".

Acta Relief Back by The Comfort Company: Features flexible, adjustable straps to offset the centre of pressure and better remove pressure points from the spine. Allows for aggressive moulding to the users natural anatomy to support many seating positions ranging from upright seating to a severely rotated back. The Boa reels and closure system create a back support that is micro-adjustable, secure, customisable and convenient. Available in 16" to 20" widths with height options of 18" or 20".

Nxt Support Contour & Plus Contour Backs by Dynamic Health Care Solutions: These fixed height back supports are soon to be discontinued and replaced with the new **Nxt Optima Plus Contour Back**. This back features 5.5"-7" depth adjustable contours and is able to offer all the features and benefits of the original models. We will continue to supply the original Nxt models until stock is no longer available, unless otherwise requested.

WHEEL BLADES

Wheelblades are a high-end mobility ski that are designed to move through snow and ice. Wheelblades 'S' attach onto the two small front wheels of a manual wheelchair and Wheelblades 'XL' attach onto the front wheel(s) of a baby stroller. Features a wide contact surface to evenly distribute pressure and prevent sinking. Lightweight, portable and easy to use with an adjustable clamp lock.
