

## J.O.B CHAIR BY NEATECH

**Designed to move people with a disability and the elderly to provide access to the beach, swimming pools and the snow**

- Large air-filled wheels allow the chair to be pushed into water and over sand
- Strong, lightweight aluminium frame will not corrode
- Can be accessorised and configured in various ways to suit the user
- Optional Third Wheel Kit makes it easier to push people. Chair can be fully upright or tipped back and allows some users to push themselves

## SMART DRIVE MX2 BY MAX MOBILITY

**Power assist device designed to attach to both rigid and folding wheelchair frames**

- Intuitive and powerful enough to cruise up hills and over thick surfaces
- Convenient all-in-one unit with built in rechargeable battery pack
- Intelligent wrist control with wireless technology senses movement so it knows when you're ready to stop and get moving
- Waikato/BOP trials only

## WHEELBLADES S

**High-end mobility skis that attach onto the small front wheels of a manual wheelchair for increased mobility (not as sporting equipment)**

- Designed to move through snow and ice with ease
- Wide contact surface evenly distributes pressure and prevents the small front wheels from sinking into the snow. Sold as a pair
- Lightweight, portable and easy to use with an adjustable lock
- Wheelblades XL available baby strollers
